SUMMARY

Frontend Developer with 4+ years of experience building scalable React applications using TypeScript and modern JavaScript. Expert in component architecture, state management, and performance optimization with proven track record of implementing micro frontend systems and design systems. Strong experience with Redux, React Hooks, and testing frameworks. Skilled in collaborating with design and backend teams to deliver high-quality user interfaces following Agile methodologies.

TECHNICAL SKILLS

Frontend: React.js (5+ years), TypeScript (5+ years), JavaScript (ES6+), Next.js, Redux, React Hooks, Context API
Component Development: Micro Frontends, Webpack Module Federation, Design Systems, Storybook, Atomic Design, Reusable Components
CSS & Styling: CSS3, Styled-Components, CSS Modules, Sass/SCSS, Tailwind CSS, Flexbox, Grid, Responsive Design
State Management: Redux Toolkit, Context API, Zustand, React Query, Custom Hooks, State Patterns
Testing: Jest (4+ years), React Testing Library, Cypress, Enzyme, Testing Best Practices, TDD
Performance: Code Splitting, Lazy Loading, Memoization, Bundle Optimization, Lighthouse, Web Vitals
Build Tools: Webpack (5+ years), Vite, Babel, Module Federation, Tree Shaking, Hot Module Replacement
Backend Integration: RESTful APIs, GraphQL, WebSocket, API Integration, Error Handling, Data Fetching Patterns
Tools & DevOps: Git/GitHub (7+ years), Jenkins, GitLab CI/CD, Docker, npm/yarn, ESLint, Prettier
Cloud Platforms: Azure (App Services, Static Web Apps), AWS (S3, CloudFront), CDN, Serverless

EXPERIENCE

Microsoft

Richardson, TX

Frontend Developer - Contract

Aug 2025 – Present

- Architect and develop enterprise React applications using TypeScript and React Hooks serving large base of users. Built 10+ reusable components implementing Fluent UI design system with comprehensive Storybook documentation, ensuring consistent UI/UX across product teams.
- Implement micro frontend architecture using Webpack Module Federation enabling independent team deployments. Optimized bundle size by 40% through code splitting, lazy loading, and tree shaking, improving Core Web Vitals and page load performance.
- Build complex state management solutions using Redux Toolkit and Context API for enterprise workflows. Developed custom hooks for data fetching, form validation, and API integration patterns, promoting code reusability across 10+ applications.
- Establish comprehensive testing strategy using Jest and React Testing Library achieving 85%+ code coverage. Implement CI/CD pipelines with Azure DevOps for automated testing and deployment, reducing deployment time by 50%.
- Collaborate with UX designers translating Figma designs into pixel-perfect responsive interfaces using CSS-in-JS and CSS Grid/Flexbox. Mentor junior developers on React best practices, TypeScript patterns, and conduct code reviews.

The Hartford (via TCS)

Bengaluru, India

Senior Frontend Developer

Dec 2021 – Dec 2023

- Led frontend development of insurance subscription platform using React and TypeScript serving 500K users with 99.8% uptime. Architected micro frontend system using Webpack Module Federation reducing page load time from 4.2s to 2.5s through dynamic module loading.
- Built comprehensive TypeScript-based component library with 60+ reusable components documented in Storybook. Implemented design system patterns ensuring consistent UI/UX across multiple applications, reducing development time by 35%.
- Optimized React application performance using memo, useMemo, useCallback, and virtualization techniques. Reduced re-renders by 45% and improved Lighthouse scores from 65 to 92, significantly enhancing user experience.
- Implemented complex state management using Redux with Redux Toolkit for enterprise workflows. Integrated with backend microservices via RESTful APIs, implementing error boundaries, retry logic, and loading states for robust UX.

- Established comprehensive testing framework using Jest and React Testing Library achieving 85% code coverage. Set up CI/CD pipelines with Azure DevOps for automated testing and deployment, collaborated with UX designers and backend teams in Agile environment.

Scaler

Software Developer

Bengaluru, India

Jan 2020 – Dec 2021

- Developed interactive analytics dashboards using React and TypeScript for edtech platform with 100K+ daily users. Built data visualization components with recharts and D3.js featuring real-time updates via WebSocket connections.
- Created comprehensive component library and design system using React, TypeScript, and Styled-Components documented in Storybook. Collaborated with UX team implementing mobile-first responsive designs, improving user engagement by 30%.
- Optimized frontend performance through code splitting, lazy loading, and bundle optimization with Webpack. Reduced bundle size by 40% and improved Time to Interactive (TTI) from 5.8s to 3.2s using performance profiling tools.
- Implemented state management using Redux and Context API for complex application workflows. Developed custom hooks for API integration, form handling, and authentication flows, promoting code reusability across features.
- Established testing practices using Jest, React Testing Library, and Cypress for E2E testing. Set up CI/CD pipelines with Jenkins achieving automated testing and deployment, collaborated with product and backend teams in Agile sprints.

EDUCATION

University at Buffalo

Master of Science in Computer Science

Buffalo, NY

Jan 2024 – May 2025

National Institute of Technology, Andhra Pradesh

Bachelor of Technology in Computer Science

Andhra Pradesh, India

Jun 2016 – Jun 2020

ADDITIONAL EXPERIENCE

Frontend Expertise: 5+ years specializing in React and TypeScript with deep understanding of component lifecycle, hooks, and performance optimization. Expert in building scalable component architectures and design systems.

Performance Optimization: Proven track record of improving application performance through bundle optimization, code splitting, lazy loading, and React rendering optimization techniques. Experienced with Lighthouse and Web Vitals metrics.

Agile/Scrum Experience: 5+ years working in Agile environment with experience in sprint planning, daily standups, retrospectives, and continuous improvement practices. Strong collaboration with UX designers and backend teams.

Mentorship & Leadership: Mentored junior frontend developers on React, TypeScript, and modern JavaScript best practices. Conducted code reviews, established coding standards, and created technical documentation.
